Specification

 The disclosure is objected to because of the following informalities: The related application information on Page 1 and 9 should be updated.

Appropriate correction is required.

Drawings

2. The drawings are objected to because figures 1 and 7a incorrectly orient the prism. Such prisms would reflect illumination light away from the light valve. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5, 7-11, 13-15 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Nagai et al.

Nagai et al. discloses a projection device comprising an LED array light source comprising red, green, and blue LED's which may be interpreted as being comprised of "groups" of r,g,b sets. Base of the LED's may be interpreted as a "wafer"

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 5-6 and 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagai et al.

Nagai et al. does not specify the method of formation of the LED array.

It would have been obvious to one of ordinary skill in the art at the time of the invention to form an LED array by a variety of methods including single and plural "substrate" bases because such is conventional electronics.
